REFERENCES

25X1D

This brief updates information given in an NPIC report of August 1965 1/ and lists changes that have taken place throughout the plant area since [REDACTED]. Locations of new structures and item numbers refer to the referenced NPIC report.

25X1D

A storage building has been constructed near item 1, one of the production buildings. Item 3, another production building, has had a small raised section added on the roof and a small extension has been made to the rear of the building. The processing tanks near item 12 have been covered, and a small support building has been erected near these tanks. A small addition has been made to item 15. In the vicinity of item 16 a support building was constructed and another building is under construction.

No construction activity, as reported in the vicinity of items 21 and 23 in the referenced report, was observed; however, a small building near the probable pumphouse in the southeast corner of the plant area has been constructed. This building possibly is associated with a new pipeline leading to a newly developed waste pond approximately 1,200 feet southeast of the plant.
